

TEMPORARY CLIMATE SOLUTIONS

MAKE UP AIR HEATERS

Make-Up Air Heaters are direct-fired heaters designed to draw fresh air through the heating unit's intake and emit tempered air into the application area. These units draw 100% of their air from the outdoors. That air is then heated and evenly distributed indoors in a controlled manner. This technology provides a safe, clean, and efficient heat source.

MODEL	MA-550	MA-1500	MA-2500	MA-4500
FUEL TYPE	DUAL FUEL	DUAL FUEL	DUAL FUEL	DUAL FUEL
BTU/HR*	550,000	1,500,000	2,500,000	4,500,000
CFM	4,400	9,500	14,000	26,000
POWER REQUIREMENTS	115V / 20AMP	208-230V / 1PH / 30AMP	208-230V / 1PH / 50AMP 208-230V / 3PH / 30 AMP	208-230V / 3PH / 60AMP 460V / 3PH / 30 AMP
IGNITION TECHNOLOGY	FENWALL HOT SURFACE	FIRE EYE DIRECT SPARK- PILOT	FIRE EYE DIRECT SPARK- PILOT	FIRE EYE DIRECT SPARK- PILOT
THERMOSTAT	25' CORD FOR REMOTE LOCATION	25' CORD FOR REMOTE LOCATION	25' CORD FOR REMOTE LOCATION	25' CORD FOR REMOTE LOCATION
STACKABLE FRAME	YES	N/A	YES	YES
